The large size and distribution of spaces offer extraordinary flexibility of use.

The large garden of approximately 1,300 m2 is one of the property's main strengths.

The available space also allows for the creation of:

swimming pool, relaxation area, barbecue area, pergolas, additional parking, leisure areas, a property with enormous potential

The real added value of this property is its development potential.

The large workshop, approximately 200 square meters in size, construction features, and layout, could be converted into a second residential unit, subject to urban planning approvals and the necessary permits.

This opportunity makes the property particularly interesting for:

Two families; parents and children who wish to live close together while maintaining their independence; construction of an outbuilding; investors interested in creating multiple units; hospitality businesses (bed & breakfasts, guest houses, or vacation homes, in compliance with current regulations); those wishing to increase the value of their investment over time.
